INVESTOR IN PEOPLE

The Patent Office
Concept House
Cardiff Road
Newport
South Wales
NP10 8QQ

I, the undersigned, being an officer duly authorised in accordance with Section 74(1) and (4) of the Deregulation & Contracting Out Act 1994, to sign and issue certificates on behalf of the Comptroller-General, hereby certify that annexed hereto is a true copy of the documents as originally filed in connection with the patent application identified therein.

In accordance with the Patents (Companies Re-registration) Rules 1982, if a company named in this certificate and any accompanying documents has re-registered under the Companies Act 1980 with the same name as that with which it was registered immediately before re-registration save for the substitution as, or inclusion as, the last part of the name of the words "public limited company" or their equivalents in Welsh, references to the name of the company in this certificate and any accompanying documents shall be treated as references to the name with which it is so re-registered.

In accordance with the rules, the words "public limited company" may be replaced by p.l.c., plc, P.L.C. or PLC.

Re-registration under the Companies Act does not constitute a new legal entity but merely subjects the company to certain additional company law rules.

Warning

After an application for a patent has been filed, the Comptroller of the Patent Office will consider whether publication or communication of the invention should be prohibited or restricted under Section 22 of the Patents Act 1977. You will be informed if it is necessary to prohibit or restrict your invention in this way. Furthermore, if you live in the United Kingdom, Section 23 of the Patents Act 1977 stops you from applying for a patent abroad without first getting written permission from the Patent Office unless an application has been filed at least 6 weeks beforehand in the United Kingdom for a patent for the same invention and either no direction prohibiting publication or communication has been given, or any such direction has been revoked.

The Background

The display of personal photographs and pictures is of great importance to most people. However as light disappears with the coming of night all images fade unless lit by an external source.

Now we have found a new way of building into each photo or picture frame a way to light the image from within the frame.

The description

A picture frame insert panel that lights the image from behind.

The light source is very slim and fits most standard photo frames and for safety is very low voltage and generates very little lamp heat.

The panel can be used in most standard sized photo frames thus allowing the pictures to be viewed in dark conditions. This could take the form of ambient sitting-room background lighting from personal favourite photos or children's Nightlight style favourite pictures.

I STANDARD SIZE PHOTO FRAME WITH GLASS

II LIGHT EMITTING 5MM BACKING

III STANDARD PHOTO FRAME BACKING WITH FOLDING STAND

IMAGE IS PLACED BETWEEN I AND II
